

#### Short Specification:

The LouversLED Bronco Magnetic Retrofit Tube is a low-cost solution to a common retrofit problem. When an external driver is required, and LED tubes are not an option, this kit fits the bill. Approved for use in fluorescent fixtures including troffers, open strips and closed fixtures. Also a great solution for 8-foot fixtures that cannot otherwise be retrofitted, especially vaportights. The Bronco is available in 2-foot and 4-foot lengths; multiple tubes can be operated by a single driver. You've seen similar products elsewhere, but no one can match the value of LouversLED!

[2-Foot Tube]

[4-Foot Tube]

KIT PART #	LENGTH	# of TUBES	SYSTEM WATTS	LUMENS	CCT	DIMMABLE?
