

Short Specification:

The Dyna-Lite is a clear prismatic pyramid shaped drop-lens made of high-impact DR acrylic. This product was designed to provide maximum light dispersion while giving the appearance of multi-directional lighting at a fraction of the cost of replacing fixtures. The one inch drop increases the perimeter lighting and the pyramid shape heightens light distribution, giving more light control with all the angles, leading to less glare. The Dyna-Lite is easy to install and fits most standard grid ceiling systems. Available in three sizes and trimmed flanges to fit your specific application. Please contact your Louvers sales representative for more information.
