LOUVERS INTERNATIONAL

Para Image™ Series
CUSTOM ALUMINUM PARABOLIC LOUVER

Short Specification:

The Para Image™ Series is a full line of high quality louvers that creates an ambiance which is pleasant, productive and efficient. The Para Image Aluminum Louver - Series 1 allows the use of parabolic aluminum louvers to be design-oriented and creative. No longer is the architect or designer forced to use oneor two standard depths and cell sizes. These are custom made to your specifications, so you can let the creativity flow.

Application:

When the environment requires critical and difficult visual tasks or when glare control and light diffusion are extremely important. Office environments, task areas, elevators, conference rooms, corridors, medical facilities, auditoriums, perimeter lighting, retail stores and banks.

Features:

Para Image™ Aluminum Series 1 is available in nominal 1' x 4', 2' x 2', 2' x 4', 4' x 4', or other sizes upon request. Our fabrication division will work with you to create the required size. Call for details.

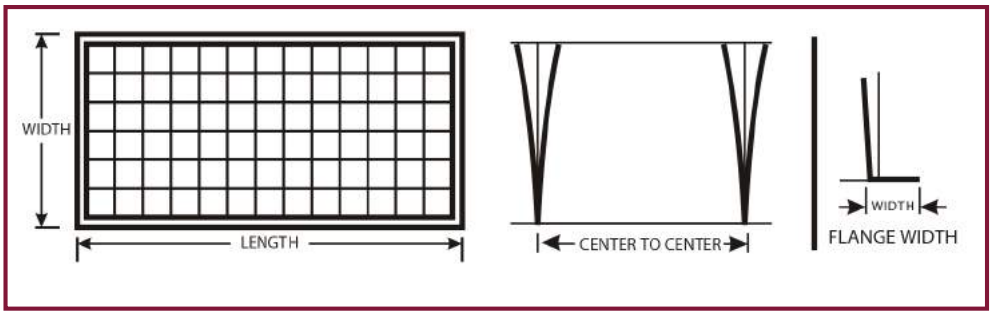
Care & Handling:


Great care should be exercised when handling parabolic louvers, avoiding contact with oily and/or foreign substances, Always handle louver panels with clean white gloves - NEVER USE BARE HANDS. Always install these louvers after the space has been completed and is ready for occupancy - never during construction.
