

Short Specification:

No longer confined to one or two standard depths and cell sizes, the Para Image™ Aluminum 1 allows the use of parabolic aluminum louvers to be design-oriented and creative. These louvers are available in specular silver, semi-specular silver, a full range of enamel colors or anodized options. The cell size can vary from 1 1/2" to 8" apart and the cell depth can vary between 3/4" and 4" deep. Because this is a non-stock, customized item, please contact Louvers International to order.

Features:

- High Lighting Efficiency
- Low Brightness
- Eliminates Glare
- Adaptable

Applications:

For when the environment requires critical and difficult visual tasks or when glare control and light diffusion are extremely important. For areas such as:

- Auditoriums
- Banks
- Conference Rooms
- Corridors
- Elevators
- Medical Facilities
- Offices
- Perimeter Lighting
- Retail/ Stores
- Task Areas

Sample Part Number: LI1-24-S

Care & Handling:

Great care should be exercised when handling specular materials, avoiding contact with oily and/or foreign substances. Always handle louver panels with clean white gloves – NEVER USE BARE HANDS. Always install these louvers after the space has been completed and is ready for occupancy – never during construction.
